New Meeting Room at Buker Community Center!

We kick off the 2012-13 meeting cycle in new digs! Our new venue is Room 11 in the north wing of Buker. This is the second room on the right if you enter the building from the main lobby, and is even more easily accessed directly from the parking lot. One advantage of the new room is a permanently-mounted projection screen. A big thank you to Kathy Ahearn for the upgraded accommodations.

Mountain Lion Demo

The festivities begin at 7:00 p.m. on September 12 at Buker Community Center, 22 Armory Street, Augusta. Yours truly will be presenting MacOS 10.8, aka **Mountain Lion**. There's s-o-o much to cover in this release. There's no way I'll get through everything I'd like to show you, but feel free to download my detailed topic outline from my [dropbox](#).

If you haven't yet had a chance to check out AirDrop, Apple's peer-to-peer wireless file transfer protocol for Macs, that too will be part of the fun. AirDrop was introduced in MacOS 10.7, aka Lion, but has been significantly enhanced in Mountain Lion. I'll be hooking up two Macs to the CAMP projector to show you how it works.

Resources

At the same time I downloaded Mountain Lion in late July, I also purchased two inexpensive e-guides to the new OS. These are Matt Neuburg's [Take Control of Using Mountain Lion](#) (TidBITS Publishing 2012) and Macworld's [Total Mountain Lion Superguide](#) (2012). If you're looking for a quick article-based intro to ML's new features, go with the latter. But for a cohesive in-depth examination of the operating system, the Neuburg book shines and is my clear favorite. -JF
